

Detailed Design Services

Foundation QA provides specialized design services to all sectors of industry - as a specialist subconsultant, to contractors submitting design/construct bids, and to client owners in both private and public sectors.

Foundation QA's design services cover all aspects of foundation engineering, including temporary and permanent retention systems.

Our design services are built on nearly 30 years of geotechnical experience in consulting, construction, education and research, and are backed by state-of-the-art software packages like Repute, Plaxis, GRLweap, Rocket, the GGU geotechnical software suite, and in-house software packages.
