

Dynamic Pile Testing

Foundation QA provides dynamic pile testing services in Australia and internationally.

Dr. Seidel is a leading practitioner and educator in the field of pile dynamics, having worked in this field since 1982. He is one of a small number of testers with Expert Certification in High Strain Dynamic Pile Testing.

Our testing services utilize Pile Dynamics Inc. PAK Model Pile Driving Analyzer, with world-wide onsite or remote full 8 sensor, 20kHz testing capability. Dynamic Testing Analysis is undertaken with the industry- standard Capwap® software.

Foundation QA's testing services are provided either directly, or through our alliance arrangements with Golder Associates, and Coffey Geotechnics, two of Australia's leading geotechnical consultancies with offices in all cities and major centres.
